

The bias of Artificial Intelligence

# The Solution & Guidelines

# Solution

The most obvious solutions to avoid losing control over Artificial Intelligence is to have universal guidelines concerning the use of AI and penalties for people who infringe these regulations. Have world wide guidelines set in place and consequences for individuals who do not respect them.

# Potential Guidelines

**01**

All AI tool must be supervised and must be periodically inspected

**02**

Data bases of AI needs to be controlled and ethically sourced.

**03**

No AI should ever have access to private or sensitive information

**04**

AI cannot generate the voice, face or body of any specific individual.

**05**

AI should only be used as a tool rather than a replacement for professionals

**06**

Individuals should be responsible for the work the publish even when using AI
